

Section 13 – Seasonal & Event Design

STATUS: APPROVED

Seasonal Design Philosophy

- * The CLA identity remains constant throughout the year.
- * Seasonal events enhance the website—they never replace its identity.
- * The website should always be immediately recognizable as CLA.

Seasonal Layering

- * Temporary seasonal elements are layered onto the existing CLA Design Language.
- * Seasonal updates may include:
 - * Photography
 - * Accent colors
 - * Background treatments
 - * Decorative graphics
 - * Event-specific content
- * Typography, navigation, components, radius, shadows, spacing, motion, and overall craftsmanship remain unchanged.

Seasonal Colors

- * Seasonal colors are carefully selected accents within the official CLA Color System.
- * Royal Blue remains the primary CLA brand color.
- * Seasonal palettes complement the brand rather than replace it.

Seasonal Decorations

- * Decorations are minimal, elegant, and intentional.
- * They support the atmosphere without distracting from the message.
- * Seasonal decoration must never overpower photography, typography, or content.
- * The focus should always remain on Christ, the church, and the message.

Event Promotion Strategy

- * The homepage Hero remains part of the official CLA Hero System.
- * Temporary featured event sections appear directly beneath the Hero.
- * This system supports:
 - * Christmas
 - * Easter
 - * Women's Night

- * Kids Camp
 - * MTC Conference
 - * Guest Speakers
 - * Baptisms
 - * Worship Nights
 - * Youth Events
 - * Community Outreach
 - * Future ministry events
-

Multiple Featured Events

- * Multiple featured events may appear on the homepage simultaneously when appropriate.
 - * Events should be prioritized by relevance and timing.
 - * Featured sections should complement one another rather than compete.
 - * The homepage should remain clean, balanced, and easy to scan.
-

Event Lifecycle

- * Events should expire automatically whenever possible.
 - * Every event should support:
 - * Start date
 - * End date
 - * Visibility schedule
 - * Website administrators may manually:
 - * Extend an event
 - * End an event early
 - * Hide an event
 - * Restore an event
 - * Override automation when necessary
 - * The long-term goal is a fully automated event management system.
-

Past Events

- * Past events are removed from the public website after they end.
 - * The public website should always focus on current and upcoming ministry life.
 - * Historical records may be stored internally rather than displayed publicly.
-

Event Landing Pages

- * Major events should have dedicated landing pages whenever appropriate.
- * Examples include:
 - * Christmas
 - * Easter
 - * Kids Camp
 - * Women's Night

- * MTC Conference
 - * Youth Conference
 - * Guest Speakers
 - * Special Series
 - * Community Outreach Events
 - * Smaller events may be promoted directly on:
 - * The homepage
 - * Ministry pages
 - * Event listings
 - * Announcement sections
 - * The Project Owner determines the appropriate level of promotion based on the importance and scope of the event.
-

Event Registration

- * The long-term standard is integrated registration directly within the CLA website.
 - * Visitors should be able to:
 - * Register
 - * Submit forms
 - * Receive confirmations
 - * Complete event sign-ups
 - * Manage registrations
 - * All without leaving the CLA website whenever possible.
-

Countdown Timers

- * Major events may include elegant countdown timers.
 - * Countdown timers are reserved for high-impact events such as:
 - * Christmas
 - * Easter
 - * MTC Conference
 - * Kids Camp
 - * Women's Conference
 - * Youth Conference
 - * Church Anniversary
 - * Countdown timers should create anticipation without distracting from the page content.
-

Illustrations & Graphics

- * Seasonal and event-specific pages may use custom illustrations and graphics when they strengthen the experience.
- * Photography remains the primary visual language.
- * Illustrations may support:
 - * Christmas
 - * Easter
 - * Kids Camp
 - * Conferences

- * Event branding
 - * Custom icons
 - * Decorative patterns
 - * Background textures
 - * Maps
 - * Informational diagrams
 - * Every illustration must remain:
 - * Elegant
 - * Premium
 - * Purposeful
 - * Cartoon-like illustrations are reserved only for intentionally designed children's experiences.
-

Seasonal Automation

- * The long-term vision is for seasonal features to activate and deactivate automatically.
 - * The website should automatically:
 - * Display seasonal homepage sections
 - * Apply seasonal accent colors
 - * Enable countdown timers
 - * Publish scheduled event pages
 - * Hide expired promotions
 - * Return to the default CLA experience when the season or event ends
 - * Website administrators should always have manual override capabilities.
 - * Automation should reduce maintenance while keeping the website current and alive throughout the year.
-
