

STATUS: APPROVED

Purpose

This section defines the testing and quality assurance standards for the CLA website.

Every public release should meet the same level of craftsmanship, reliability, accessibility, and performance expected throughout the CLA project.

Quality Philosophy

Quality is built throughout development.

Testing is not a final step—it is part of every stage of the development process.

Functional Testing

Before every release, verify:

- * Navigation
- * Links
- * Forms
- * Buttons
- * Interactive components
- * Search
- * Language switching
- * Media playback
- * Downloads

Every feature should behave as intended.

Responsive Testing

Every page should be tested on:

- * Mobile Portrait
- * Mobile Landscape
- * Tablet Portrait
- * Tablet Landscape
- * Desktop

Layouts should remain consistent and usable across all supported screen sizes.

Browser Compatibility

The website should be verified in all major modern browsers.

Testing should confirm consistent behavior, layout, and functionality.

Accessibility Testing

Every release should verify:

- * Keyboard navigation
- * Focus indicators
- * Color contrast
- * Screen reader compatibility
- * Form accessibility
- * Alt text
- * Responsive zoom behavior

Accessibility issues should be resolved before deployment whenever practical.

Performance Testing

Performance verification should include:

- * Page loading speed
- * Image optimization
- * JavaScript performance
- * CSS efficiency
- * Animation smoothness
- * Mobile responsiveness

Performance regressions should be corrected before release.

Visual Review

Every page should receive a final visual inspection.

Verify:

- * Alignment
- * Spacing
- * Typography
- * Photography

- * Colors
 - * Component consistency
 - * Motion
 - * Overall craftsmanship
-

Content Review

Every page should be reviewed for:

- * Grammar
- * Spelling
- * Translation accuracy
- * Consistency
- * Broken content
- * Outdated information

Published content should reflect the quality standards of the CLA ministry.

Release Checklist

Before deployment, confirm:

- * All planned work is complete.
 - * No placeholder content remains.
 - * No broken links exist.
 - * No console errors remain.
 - * Forms function correctly.
 - * Responsive layouts are verified.
 - * Accessibility has been reviewed.
 - * Performance meets project standards.
-

Continuous Improvement

Lessons learned during testing should improve future development.

Testing procedures may evolve during the six-month architecture review.

Guiding Principle

Every visitor deserves a polished, reliable, and trustworthy experience every time they visit the CLA website.
